## DETAILED ACTION

### *Continued Prosecution Application*

The request filed on 12/9/03 for a Continued Prosecution Application (CPA) under 37 CFR 1.53(d) is acceptable and a CPA has been established. An action on the CPA follows.

### *Claim Rejections - 35 USC § 103*

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claim: 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Smith in view of Khan.

U.S. patent No. 6,587,557 ( Smith et al) discloses a System and method for distributing outbound telephony services over a computer network, comprising a plurality of distributed call centers, each of said plurality of call centers including a CTI system having a data record system ( elements 40 and 42 in Fig. 1, col 2 lines 52-57, col 4 lines 10-16), said plurality of distributed call centers linked over a computer network ( computer network 30 in Fig. 1) , said system capable of transferring a data record between said plurality of distributed call centers ( call list group record is transmitted to each distributed call center in the network, col 5 lines30-34), as in claim 1.

Smith did not specifically disclose each of said distributed CTI having a dynamic record exclusion system having at least one exclusion table, said system comprising an exclusion record

Art Unit: 2661

exporter and an exclusion record importer interfacing said dynamic data record exclusion system.

U.S. patent No. 6,345,094 ( Khan et al) discloses an Inbound / Outbound Call Record processing system, comprising a distributed CTI ( 14 in Fig. 1) having a dynamic record exclusion system ( Call record processing system updates record in real time and include an exclusion list, col 6 lines 18-26) having at least one exclusion table ( exclusion list 58 in Fig.1) , said system comprising: an exclusion record exporter ( Outbound call campaign manager that is responsive to the Exclusion list 58, col 6 lines 64-67) and an exclusion record importer ( inbound call campaign manager 60 in Fig. 1) interfacing a dynamic data record exclusion system (In response to an inbound call the call record finder 30 looks up for a matching call record by searching the call record updates 38, when the call record is found the record is placed in the exclusion list 58, (col 8 lines 9-145) , as in claim 1.

Therefore, it would have been obvious to a person of ordinary skill in the art at the time of the invention to provide the method as disclosed by Khan to the system disclosed by Smith with the motivation of obtaining a system and method for processing inbound and outbound telephone calls that allows records in an outbound call list to be accessed and used for inbound telephone calls.

***Allowable Subject Matter***

3. Claim 14 is allowed.

Art Unit: 2661

4. Claims 2-13 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims .

***Conclusion***
